Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Wednesday 27 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy and damp for many. Less cold than on Tuesday.

Today:
A rather cloudy and damp day, with some outbreaks of patchy light rain and drizzle at times, especially across the Pennines. Perhaps some clearer spells developing in the far north later. Less cold than on Tuesday. Maximum temperature 5 deg C (41 deg F).

Tonight:
A cloudy and damp night for most. However, a band of rain will slowly arrive from the southwest during the early hours, turning to snow on the hills. Cold. Minimum temperature 2 deg C (36 deg F).

Thursday:
A band of rain and snow will continue to move slowly northeastwards during Thursday. Some significant snowfall on the hills, but not exclusively. Snow turning lighter and patchy overnight. Cold. Maximum temperature 3 deg C (37 deg F).

Outlook for Friday to Sunday:
Rain and snow gradually easing on Friday. Widespread severe frost overnight. Dry, sunny and cold on Saturday and early Sunday, before rain and hill snow arrives from the west later.
